

MOUNTING INSTRUCTION FOR PART NUMBER 45-1406 GL1800 LED Front Fender Light

Note: Read instruction thoroughly before installing and check lights before installing.

1. Place bike on center stand.
2. Clean the outside surface of the front fender where the LED light accent will go with alcohol.
3. Check placement for light, then remove backing tape from fender light and press on firmly.
4. Run wires under the front fender and feed through bike avoiding moving parts and attach the black wire to ground and white wire to the accessory circuit.
5. Repeat on the other side.
6. We strongly suggest the purchase of part 18187, 18188, 18189, 18190 Accessory Switch Kits for the switching off all accessories. If the bike has a computer board then attaching any accessory into the harness may cause damage.
